

L3 Light Duty Hybrid / Electric Vehicle Specialist

EV TECH International offers you the training to level up your skills and start a new journey with the new technology.

We have assembled the first comprehensive program to correlate where applicable with the L3 certification test standard established by the National Institute for Automotive Service Excellence (ASE). The EV curriculum is taught by industry ASE Master Certified technician Instructor's.

YOUR NEXT LEVEL AS AN EV TECHNICIAN STARTS HERE!

The automotive industry has evolved greatly in the last couple of years with advances in autonomous, hybrid and electric vehicles. Technology continues this advance to the level that there are automobile manufacturing companies already announcing that within the next decade, they will no longer sell vehicles that use petroleum (fuel; diesel), everything will be electric. Starting from this point of view, EVTI has developed the most comprehensive training available without a need to require a college degree to complete the needed education and hands on training.
